

Websites

Fully branded sites configured in different languages, built with no coding skills and easy-to-use templates. Drag & Drop module system, with more than 80 modules. You can also use our white label solution to create your own fully branded corporate website. Link it with your event sites and forget about page updates.

Event Registration & Ticketing

Easily collect and manage data and online payments. Generate tickets, invoices and badges with your own web domain. Conditioned registration process depending on your different delegates or tickets, and customised auto-emailing system. Make the process paperless and error-free.

Onsite Registration

With our on-site check in app, attendees can check-in and out fastest than ever. Fully sync with the database even when you are offline. Scan QR codes and simplify the process.

Event Apps

Native Apps for Android and iOS, for one or more events and fully sync with the system. Customise and brand it your own way and boost engagement. Enjoy notes, polls, surveys, networking, messaging system, and more.

1-2-1 Meetings / Matching

Help delegates arrange meetings and build their own agenda with our matchmaking system. Control de number of meetings, moderate the access, brand it, and get reports of the meetings and the sessions. Grow your network.

Emailing

We are aware of the importance of promoting our events in a automatic and simple way. EventsCase platform allows you now to send marketing campaigns to improve event registration. The system generates lists from CSV files and sends campaigns to them. Once we send the campaigns, they can be filtered and resent to those contacts who didn't open the previous email or remove the already registered attendees so they can receive news that are relevant to them.
